

## About us

About us contains your health center's information for the Saber Analytics application. Use it to maintain the address, administrative contacts, and service categories. The About Us section also lets you customize the look of Saber Analytics for your practice.

Saber Analytics employs role-based access controls for users. This means that an assigned role drives permissions and that they cannot be selected a la carte per user. This is to simplify user management for administrators. Depending on your user role, some areas may be view only, while others may allow you to add or edit information.

## Address

The Address section lets users maintain the health center's name, address, time zone, and software applications.

The software applications, specifically the accounting software, indicate which applications are used by your health center, which guides future prioritization of possible integrations.

### Address See history

Populate the following information below about your health center ensuring all required information is completed.

Health center id	Source system id	Health center name *	Doing business as	Health center nickname	Health center website	Company NPI
1000	<input type="text"/>	UAT Data Tenant	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
