

Theme

The Theme area lets you customize the look of the Saber Analytics banner for your practice. Use your company's logo and brand colors for the application banner.

Notes:

- The Preview lets you see your logo and color choices as you make changes.
- Use the ".jpg," ".jpeg," ".png," or ".svg" file formats for the logo. The preferred file formats are ".png" or ".svg."
- Click the **Choose file** button to upload your logo. The logo format file size must be less than 20971520 bytes.
- Use standard Hex or RGBA color codes for your brand color.

Theme See history

Brand the top navigation bar with your health center's color and logo. *Please note* using too light colors will prevent the font of the menu from being visible. Changes here display to all users, not just you.

See your company's logo instead of the default branding by selecting a file. This logo will be seen by all users.

The logo file format should be either ".jpg", ".jpeg", ".png", or ".svg", and its size should not exceed 20 MB. For optimal quality and scalability, it's recommended to use the ".png" or ".svg" format. [Click here to revert back to the default branding.](#)

Saber Analytics

See your company's primary colors in the banner instead of the default branding by choosing a color. This banner color will be seen by all users.

Color picker tool showing a blue gradient and color selection options. The tool includes a hex code input field with the value "203863", and RGB and RGBA input fields. The RGB values are 32, 59, and 99. The RGBA values are 32, 59, 99, and 100. Below the input fields are two rows of color swatches: the first row has 10 swatches (red, orange, yellow, green, cyan, blue, purple, magenta, pink, grey) and the second row has 10 swatches (light blue, light green, light yellow, light orange, light red, black, dark grey, white, and two empty boxes).
