

User Profile

The User Profile icon provides users access to various features and settings, enhancing their experience. Changes in this area only affect the individual user, not others from their health center using the solution.

About Me

The About Me feature provides the user's account information. It provides a read-only view of the user's assigned role with its associated permissions and subscriptions.

Saber Analytics employs role-based access controls for users. This means that an assigned role drives permissions and that they cannot be selected a la carte per user. This is to simplify user management for administrators. Depending on your user role, some areas may be view only, while others may allow you to add or edit information.

Role & Permissions

The Role & permissions feature provides detailed information about the user's designated role and permissions within the software. This helps to understand what can be accessed and what actions can be performed. It contains an interactive Permissions panel that lets users view the descriptions of a single or multiple permissions.

To view a specific permissions feature:

1. Navigate to **About Me** and access **Role & permissions**.
2. Click a permission title [i.e., Data-View].
3. The **Permissions** panel opens, displaying the permission with its detailed description.

The screenshot shows the 'Role & permissions' page. On the left is a dark blue sidebar with menu items: Account, Role & permissions (highlighted with a red box), Subscriptions, Preferences, Time zone, Theme, Security, and Password reset. The main content area is titled 'Role & permissions' and contains the following text: 'Your role is **Product - Internal**. You were assigned the role **09/21/2024**. The permissions associated with your role include: About us-Edit, Audit log-View, Consumption/billing data-View, Data-View, Hard delete, **KPI targets-Edit** (highlighted with a red box and a red arrow pointing to the right), Moodle training, Page definitions-Edit, Permissions-Edit, Personas-Edit, Pipeline history-Refresh, Pipeline history-View, Product lines-Edit, Reporting groups-Edit, Roles-Edit, and Scrubbing rules-Edit. On the right, a 'Permissions' panel is open, showing a search bar with 'KPI targets-Edit' and a detailed description for 'KPI targets-Edit': 'Allows user to edit Key Performance Indicator (KPI) targets for the organization. KPI targets allow users to specify desired targets for their health center performance and highlight when data is meeting or not meeting those targets'. A close button (X) is visible in the top right of the panel.

4. Once finished, click the **X** in the **Permissions** panel to close it.

To view multiple permissions:

1. Navigate to **About Me** and click **Role & permissions**.
2. Click **Learn more** at the bottom of the permissions associated with your role list.
3. The **Permissions** panel opens, displaying **all** permissions.

Role & permissions

Your role is **Read-only - Admin**.

You were assigned the role **10/21/2024**.

The permissions associated with your role include:

- About us-View
- Audit log-View
- Consumption/billing data-View
- Data-View
- Pipeline history-View
- Reporting groups-View
- Subscriptions and alerts-View
- Users-View
- Value set mappings-View

Permissions

Search

About us-Edit
Allows user to edit information about their organization such as name, nickname, address, and time zone

About us-View
Allows user to view, but not edit, information about their organization such as name, nickname, address, and time zone

Audit log-View
Allows user to view history of changed and viewed data and changed permissions throughout the application.

Consumption/billing data-View
Allows user to view charges incurred by the organization for data refreshes as well as day to day operations to make invoicing clear and easy.

Data-Refresh
Allows user to pull a fresh incremental data update from their source system

Tip: Use the Search text box to enter a specific permission to view. Or use the panel's scrollbar and scroll through the permissions listed.

4. Once finished, click the **X** in the Permissions panel to close it.
